*The Human Body can measure what no instrument can do (Goethe)*

- **(Schrödinger + Heisenberg) - Goethe = 0**
- **Localization is not explanation**
- **Correlation is not causation**
- **Association is not causation**

# Human Body as a Spectroscope

**ABSORPTION** = 4 fundamental interactions

**EMISSION** = 4 fundamental atoms ( C.H.O.N)

4 nucléotides ( A.G.T.C)

4 Pigments

4 neurotransmitters

**Resonant cavity** ( amplifier)

**Harmonic oscillator Manifold** -» **conformal mapping**

of cell microtubules to cardiovascular networks.

Vascular resonance is a real time in vivo biochemical bioassay

## **6 zones of vascular longitudinal resonance constitute a spherical dynamic system**

### **VERTICAL AXIS OF ROTATION**

- 2 ulnar arteries

### **EQUATORIAL PLANE**

- 2 radial arteries
- 2 pollicis arteries

*The 2 radial arteries resonate to ecto-endoderm or explicate order*

*The 2 pollicis arteries resonate to mesoderm or implicate order*

# 4 zones of biochemical pigment resonance

# Ontological Structure

## Cellular Organigram

# Structure ontologique

Organigramme ontogénétique

# Gastrula

# **RESONANCE** between 4 fundamental interactions and 4 fundamental biologic layers

- Ectoderm = **electro-magnetic**
- Endoderm = **weak nuclear**
- Mesoderm intra- embryo = **strong nuclear**
- Mesoderm extra- embryo = **gravitational**

**Parallelism ontogenesis = cosmogenesis**

# Vascular vibratory equivalence

*between*

- 4 biochemical pigments

*and*

- 4 Fundamental interactions
- 4 Fundamental embryologic layers
- 4 Atoms: Carbon, hydrogen, oxygen nitrogen
- 4 Nucleotides of D.N.A
- 4 Neurotransmitters
- 4 Secondary messengers

*and*

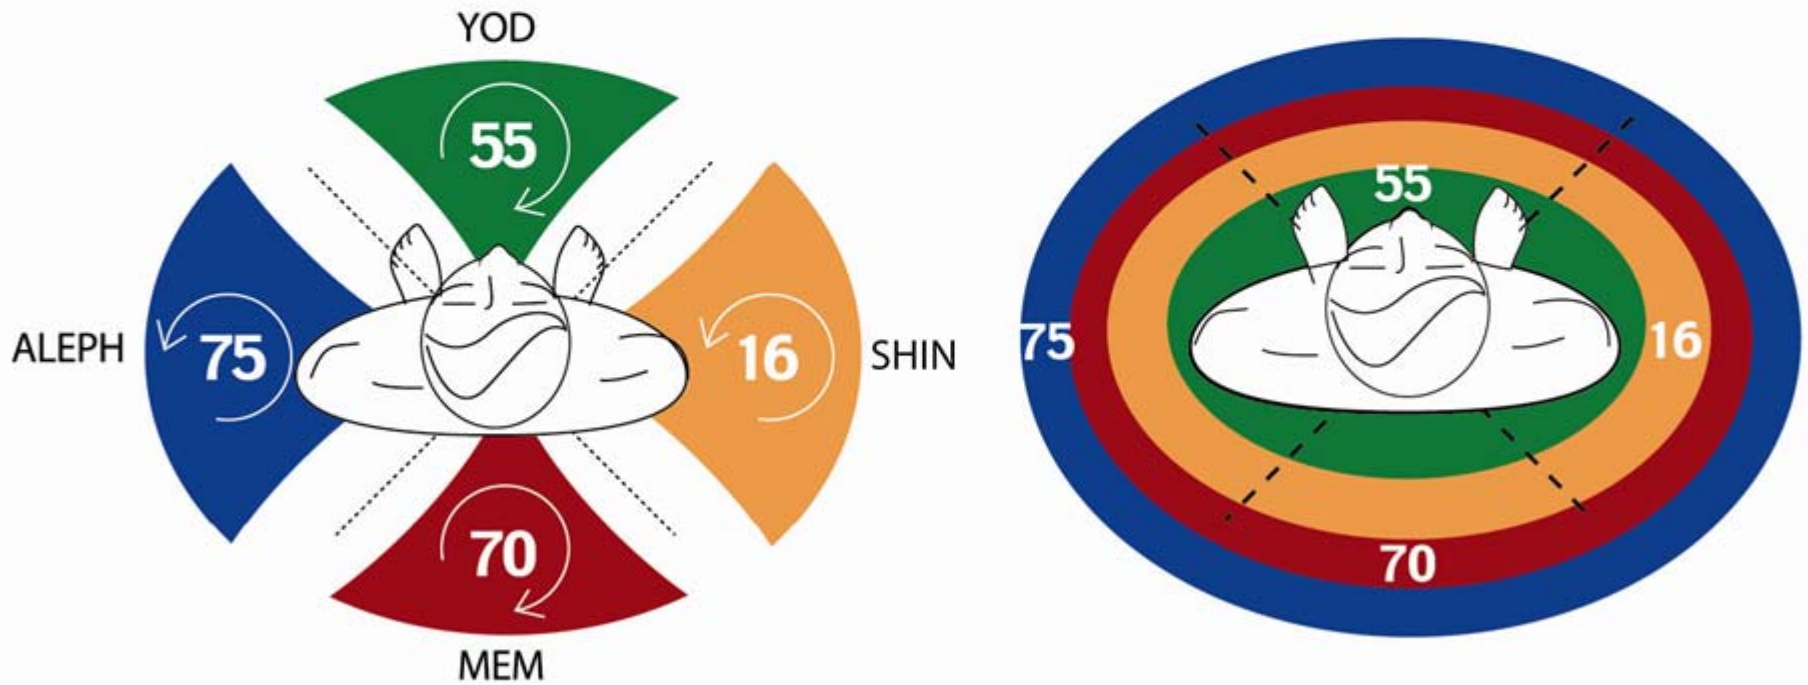

- Hieroglyphics, ancient ideograms( Hebraic, Sanskrit, Chinese)

*Gave rise to*

- **Vascular Semantic Resonance**

***Semantic resonance is the common axis to matter and antimatter***

# Vibratory spectrum matter/antimatter (aura)

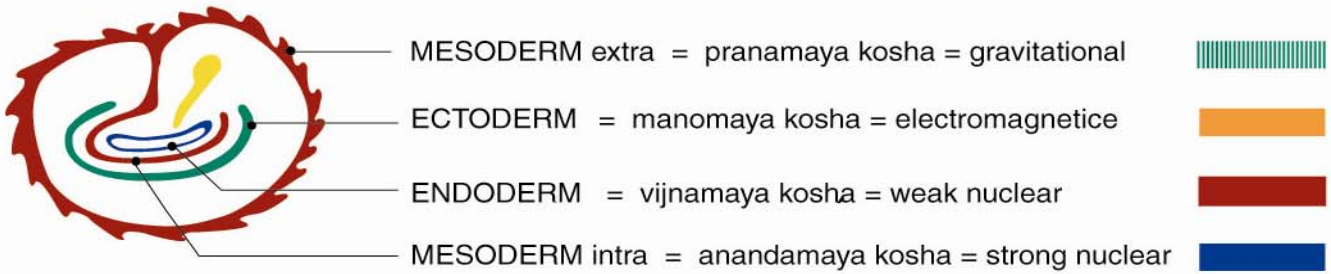

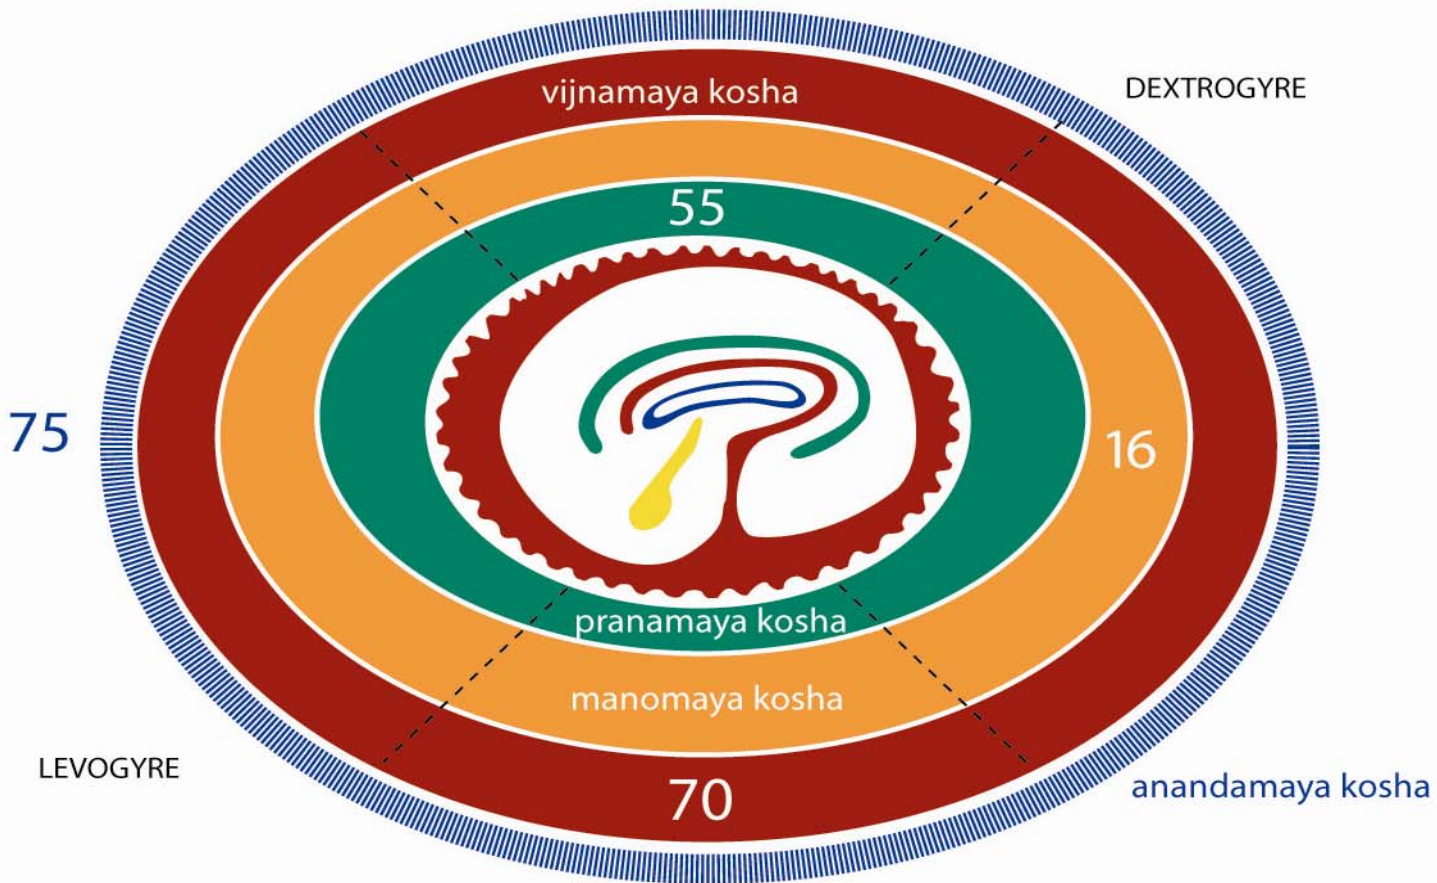

# Vascular semantic resonance

- A **mesodermic phenomenon**, bypassing the neuro-ectodermic sensory apparatus
- Detects directly **the meaning** of geometric curves, ideograms and symbols
- Resonate to concepts.
- Shows that matter resonates with quanta and antimatter with qualia
- Matter (electron) and Antimatter( positron) are « **Complex Conjugates** »
- Each fundamental matter interaction communicates with a specific antimatter layer or kosha of Aura.
- **Phase conjugation prevents annihilation ?**
- **Semantic is the common axis to matter and antimatter**

# Embryology of Aura

**Mesoderm extra-embryo or Chorion is wrapping all the embryo and resonates like Morula or undifferentiated stage.**

**The umbilical cord connects the rhythm of mother's universe with embryo cardiovascular Mesoderm which has its own rhythm.**

**Morula or/and Mesoderm extra-embryo resonates to**

***Gravitation***

***Protopsyichism***

***Cosmic consciousness, Clear Light, NDE***

***Non local Mind***

***Ultimate reality***

***Wave Function***

***Degeneracy***

***Da - Sein***

**Endoderm resonates to Wave Function Collapse or Localization**

**Vascular Semantic Resonance showing identical vibratory spectra between Morula, Gravitation, Protopsyshism and Wave Function suggests a common function of Potentialisation.**

**Collapse of Wave Function or Materialization belongs to Endoderm Liver Protein formation and Transcriptase.**

**Quanta are associated with matter transverse vibrations and Qualia with Antimatter longitudinal vibrations.**

**Semantic is the common vertical axis of Matter quanta and Antimatter qualia**
